# CSE 437 Lab Assignment 3: Building a BMI Calculator

Introduction

In this lab, you will create two activities for a BMI calculator. The first activity accepts the weight and height of the user and the second activity displays the BMI value.
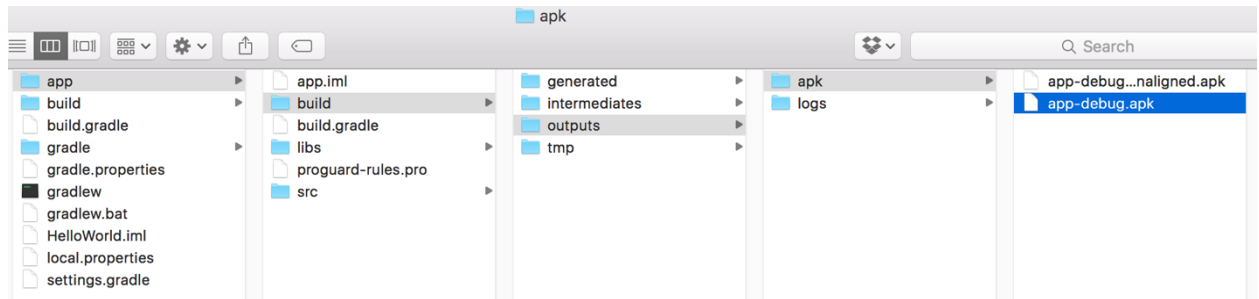

Instructions:

Create the following layouts for both activities. Make sure the layout works in both orientations with no problems. Use an intent to send the BMI value from the first activity to the second activity.

Submission Instructions

1. Open a "Windows Explorer" window (Finder on Mac) and navigate to the project source code location

2. Copy the app-debug.apk file to your desktop. Rename the file to <lastname_firstname_lab03.apk> and send it to **pete.ragheb@gmail.com with the** subject line: CSE437_Lab3

3. Print a hard copy of the activity_main.xml files and the java file(s). Write your name and class number on the paper and submit it to the lab instructor.

4. Demonstrate your app on a real device and show it to the lab instructor during the lab time for marking and feedback.

5. Keep a copy of the project workspace for your record. The lab instructor might ask you to submit it during the marking process.
